SUMMARY

A Mobile Application Developer with 4 years of professional experience in building high-performance iOS and Android applications. Highly proficient in React Native, Kotlin, and Swift, with a track record of delivering complex projects ranging from airline systems to BLE-integrated hardware solutions. Skilled in managing the full app lifecycle, including secure authentication via Auth0 and Keycloak, and monetization through Stripe and RevenueCat. Committed to delivering clean, maintainable code and seamless user experiences across mobile and web platforms.

EDUCATION

- **Bachelor's Degree in Management Information Systems (Ongoing)**
Anadolu University / Eskisehir
2024 - Present
 - **Bachelor's Degree in Biology**
Ege University / Izmir
2011 - 2017
-

WORK EXPERIENCE

Commented.io / DigiEGGS Software Solutions - Mobile Application Developer

September, 2022 – Present

Mobile Development

- Programmed and maintained 12 mobile applications across iOS and Android platforms using React Native, Kotlin, Swift and Ionic.
- Delivered 8 greenfield projects from concept to production.
- Independently published 7 applications to the Apple App Store and Google Play Store.
- Built mobile application with BLE (Bluetooth Low Energy) connectivity for seamless communication with hardware devices.
- Implemented secure authentication and authorization systems using Auth0, Keycloak, Google Sign-In and Apple Sign-In.
- Integrated RESTful APIs and GraphQL services to ensure efficient data exchange and application performance.
- Integrated and maintained in-app purchase and subscription systems using RevenueCat and Stripe.
- Implemented Push Notifications, Deep Linking, and mobile analytics solutions.
- Applied MVVM, Clean Architecture, SOLID Principles, and Dependency Injection patterns to improve maintainability and scalability.
- Participated in Agile/Scrum development processes and contributed to release planning and delivery.
- Managed mobile application deployment and release processes through App Store Connect, Google Play Console, and Expo EAS.
- Optimized application performance, startup time and overall user experience across production applications.

Web Development

- Architected responsive web applications and internal business tools using React, TypeScript, Vite and Tailwind CSS.
 - Collaborated with backend teams to integrate APIs and business workflows into modern web interfaces.
-

KEY PROJECTS

BermudAir Airlines

React Native, TypeScript

- Delivered customer-facing airline platforms tailored for iOS and Android ecosystems.
- Implemented booking-related workflows, authentication and API integrations.

[App Store](#) , [Play Store](#)

BermudAir – Vision Turnaround

React Native, TypeScript

- Created an internal operational mobile application utilized for aircraft turnaround management and real-time workflow tracking.

BoyaDyo B2C

Kotlin

- Created and optimized Android application supporting customer-facing business processes.

[Play Store](#)

Yaşar Bilgi Pazarlama B2B

SwiftUI & React

- Formulated native iOS and web solutions supporting B2B operations and internal workflows.

[App Store](#) , b2b.ybp.com.tr

Dijital.Seyahat

React Native & React

- Designed mobile and web applications for travel and expense management processes.

[App Store](#) , [Play Store](#) , dijitalseyahat.yasar.com.tr

Commented Mobile SDK

Kotlin

- Contributed to the development of a reusable Android SDK for third-party integrations and mobile products.

commented.io - Visuals available in [portfolio](#)

Triwi – Smart Bra

React Native, TypeScript

- Implemented BLE-enabled mobile features for communication with wearable hardware devices.

Visuals available in [portfolio](#)

Logg – Personal Journal & Activity Tracker

Android (Kotlin)

- Programmed and maintained a journaling and activity tracking app with core features like habits, reminders, media, and calendar-based tracking.

- Integrated Apple Health, Spotify, Strava, and location-based services.

- Improved performance, stability, and overall user experience through continuous enhancements.

Visuals available in [portfolio](#)

PERSONAL PROJECTS

LetsCalc - Notepad Calculator

React Native, React, TypeScript

- Designed and developed a calculator application that combines note-taking and calculation workflows.
- Built and maintained mobile and web versions from a shared product vision.
- Published applications to both the Apple App Store and Google Play Store.

letscalc.com, [App Store](#) , [Play Store](#)

Coloring Time: Coloring Book

React Native, React, Node.js

- Formulated a cross-platform coloring book application with supporting web platform.
- Designed and implemented backend services using Node.js.
- Managed the complete product lifecycle from development to deployment.

mycoloringtime.com, [App Store](#) , [Play Store](#)

Neon Words - Quiz

React Native, React, Node.js

- Built a word-based quiz platform available on mobile and web.
- Architected frontend and backend infrastructure independently.
- Published and maintained production-ready releases across multiple platforms.

SKILLS

Mobile Development

- React Native, Expo, Kotlin, Swift, SwiftUI, Android SDK, BLE (Bluetooth Low Energy), Mobile UI/UX Principles

Web Development

- React, Next.js, TypeScript, JavaScript, Vite, Tailwind CSS

Architecture & Patterns

- MVVM, Clean Architecture, SOLID Principles, Dependency Injection

State Management

- Redux Toolkit, Context API, TanStack Query

Backend & Authentication

- REST APIs, GraphQL, Auth0, Keycloak, Google Sign-In, Apple Sign-In

Cloud & Services

- Firebase, OneSignal, RevenueCat, Stripe

Testing, Performance & Deployment

- Unit Testing, Mobile Performance Optimization, CI/CD, App Store Connect, Google Play Console, Expo EAS, Docker, Vercel, Coolify

Methodologies & Tools

- Agile, Scrum, Git, GitHub, Gitlab, Deep Linking, Push Notifications, In-App Purchases (IAP)

CERTIFICATES

Android Mobile App Development Course

- Academy Club - Beginner Level / 67 hours
- Academy Club - Advanced Level / 35 hours

LANGUAGES

- English (Professional Working Proficiency)
